

# 10 Quick Tips to Avoid High Winter Bills

Looking to lower your bills this winter? Use the 10 tips below to conserve energy.

1

Seal air leaks and insulate well to prevent heat from escaping and cold air from entering your home.

2

Reduce waste heat by installing a programmable thermostat.

3

Turn off lights when not in use.

4

Lower your water heater temperature. The Dept. of Energy recommends using the warm setting (120 degrees) during fall and winter months.

5

Unplug electronics like kitchen appliances and TVs when you're away.

6

Open blinds and curtains during the day to allow sunlight in to warm your home.

7

Close blinds and curtains at night to keep cold, drafty air out.

8

Use power strips for multiple appliances, and turn off the main switch when you're away from home.

9

Wash clothes in cold water, and use cold-water detergent whenever possible.

10

Replace incandescent light bulbs with LEDs, which use at least 75 percent less energy.
